West Lafayette Observatory

East side of West Lafayette Elementary School
600 Cumberland Ave.
West Lafayette, IN

Observatory Information: 16", 13", and 8" diameter telescopes, Lunt LS60TH α solar scope.

Astronomy is a fascinating hobby. Share in the wonders of our universe. Observe or photograph memorable objects in the sky.

- ★ The Moon
- ★ Constellations
- ★ Galaxies
- ★ Comets
- ★ Meteor Showers
- ★ Milky Way
- ★ Asteroids
- ★ Earth Orbiting Man-Made Satellites
- ★ Solar & Lunar Eclipses
- ★ All the Planets
- ★ Safe Observing of Solar Flares & Sunspots
- ★ Aurora Borealis
- ★ Nebulae and More!

Why Become a Wabash Valley Astronomical Society Member?

- ★ Fellowship with other astronomy-loving amateurs
- ★ Meet/Teach groups interested in astronomy
- ★ Borrow an 8" WVAS telescope
- ★ Award-winning monthly newsletter, *The Nebula*
- ★ Learn something about astronomy at each open meeting during presentations and "Astronomy News" discussions
- ★ Take part in star parties and observing sessions attended or sponsored by our club
- ★ Share observing through a variety of telescopes owned by fellow members
- ★ Solid advice on buying your first telescope
- ★ Be a part of promoting astronomy at schools, outings, and festivals
- ★ Astronomical League and NASA Night Sky Network membership
- ★ Promote dark skies in North Central Indiana

Prairie Grass Observatory at Camp Cullom

Observatory Information: 28" Starmaster telescope, 16" Meade LX200R telescope, 7" Meade ED APO refractor telescope, 100 mm binoculars on universal mount, warming room with internet access point.

WVAS 2025 Public Stargazing Events

The Wabash Valley Astronomical Society hosts several free public stargazing Open Houses, normally at the West Lafayette Observatory. Join us to observe our moon, sun, planets, constellations, star clusters, nebulas, and even other galaxies. Viewing is done with the naked eye, binoculars, and telescopes. Activities may include constellation identification, slide shows, and viewing celestial objects. Dates and times for this year's scheduled Open Houses are:

April 5	8:30-10:00 p.m.
May 3	9:00-10:30 p.m.
June 1 (solar)	3:00-5:00 p.m.
Sept. 6	8:30-10:00 p.m.
Oct. 4	8:30-10:00 p.m.

In case inclement weather cancels stargazing, the slide show may still be presented indoors.

Additional events may be scheduled during the year, such as a telescope-buying tutorial on Nov. 1. Dates, times, locations, and any changes are listed in the Public Events section of our web site (www.wvastro.org).

We're also a primary host of the annual **Indiana Family Star Party** weekend (**July 25-26**) at Camp Cullom, near Mulberry) and we assist with other events at that location. See indianastars.com for a schedule of Prairie Grass Observatory (PGO) events.

Good Meteor Showers in 2025

Shower Name	Morning of Peak	Radiant & Direction	Hourly Rate
*Lyrids	April 22	Lyra (E)	18
*Perseids	Aug. 13	Perseus (NE)	100
Leonids	Nov. 17	Leo (E)	15
Geminids	Dec. 14	Gemini (high)	120

* indicates possible moonlight interference.
